DETAILED ACTION

Inventorship

In view of the papers filed 05/09/07, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by adding inventor Jan-Eirik ELLINGSEN.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Response to Amendment

Amendments filed 12/30/04 & 02/26/07 have been accepted.

Claim Objections

Claims 1 and 13 are objected to because of the following informalities: in lines 1-2 “characterized” should be “characterized”. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-12 contain improper method claims because the method claims do not provide and steps for performing the method. Also to claim 12, an apparatus cannot be dependent on a method.

Allowable Subject Matter

Claims 13-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose or reasonably teach an implant for implantation into bone tissue having an implant surface characterized in that at least a part of the implant surface comprises a microroughness which comprise pores and peaks as disclosed.
